

GENSOUTH

Louisiana's Trusted Generac Power Systems Industrial Distributor

We're dedicated to providing "Best in Class" power generation expertise – with recognized excellence in generator sales, service and support.

Since 2006, GenSouth has been offering Generac emergency power standby and mobile generator systems. We offer all related power systems components including:

- Automatic Transfer Switches
- Switchgear
- Fuel Systems
- Accessories

The professional team at GenSouth has succeeded in our mission to be the "Best in Class" power generation company in Louisiana. We've done this by developing honest long-term business relationships and providing superior customer service.

We also provide comprehensive generator service and maintenance programs on all brands of generator systems and carry an extensive inventory of parts for rapid response service.

We support our customers with generator rentals for temporary power needs as well as turnkey installation services for those customers requiring a complete emergency power solution.

Headquartered in St. Rose Louisiana with a parts and service location in the Baton Rouge area and a fully certified Industrial Generator Dealer "Emergency Power System" located in Shreveport, the GenSouth distribution network covers the entire State of Louisiana.

GENERAC® | **INDUSTRIAL POWER**

Your Source for Generator Sales, Service & Parts

Generac Generator Sales

We offer standby power generators for a wide variety of industrial and commercial applications including:

- Modular Power Systems (MPS)
- Single Gensets up to 2MW
- QT Series
- Bi-Fuel systems

We also offer mobile generators that provide power for remote sites as well as auxiliary power for construction, gas and oil field operations, telecommunications and more.

Companies throughout Louisiana have relied on GenSouth as "The Power Generation Experts" to provide reliable and cost effective emergency power solutions. We take great care to assess, design and select the proper system and components that will meet your automatic standby power needs now and into the future.

Generator Service & Repair

When it comes to providing 24/7/365 service for all your emergency power needs, turn to the trusted team at GenSouth. We service all major brands of generators and provide complete maintenance and repair services, testing, replacement parts and remote monitoring. Our certified technicians will ensure your generator system is ready whenever a power emergency strikes.

Comprehensive Generator Services:

- 24/7 emergency service, 365 days a year
- Scheduled maintenance programs
- Warranty support
- Maintenance, repair and testing programs
- Load bank testing
- Generator monitoring
- Installations
